CIVIC & BUILDING ENGINEERS

RC. 728609

COMPANY PROFILE

WHO WE ARE

ZZB CONSTRUCTION COMPANY is a wholly owned Indigenous engineering outfit incorporated under The Federal Republic Nigeria Companies and Allied Matter Act with registration number RC: 728609.

Our core competence area is Mechanical and Civil Engineering with strong-competitive edge as Contractor; and Consultants. Overtime, we have emerged to be -tested and trusted hands in estate development and management, we engage in the rehabilitation, renovation and construction of roads, bridges, savages, dams, structural works of all ramification and building.

Driven by a strong philosophy with a well distilled vision and mission statements encapsulated in the slogan... “we chose to differ” we have enjoyed - sustainable business relationship with extensive, list of clients that, cuts across corporate, Private, Federal, State and Local Government agencies and parastatals.

Since inception, the company has successfully carried out various projects for The likes of UACN Properties, MTN Nigeria Ltd, AlanDick & Co West Africa, V.G.C Communications, javelin Construction Ltd, Eldorado Nigeria Ltd, Winnerman (Nig) Ltd, FERMA, Lagos, Osun, Kwara states governments and Aero Contractors Ltd..

Our Mission

To attain recognition in the construction industry through honesty, commitment, competence and moving up step by step to greater heights.

ZZB is constantly striving to excellence, and openly aspires to be one of the 5 best indigenous engineering contractors in Nigeria. Work with us and you will see how we are achieving just that.

Our Strategy

Entering the construction Industry in an era when the clamour for improved involvement of indigenous construction firms in the nation's developmental projects is high can be considered as both apt and challenging for any firm that is determined to be ranked among the best.

From the inception, our strategy has been to earn your trust through honesty and competence, driven by the commitment to move up, step-by-step to greater height in our bid to justify the People's faith in a befitting local content in Nigeria infrastructural development. Suffice to savours has been a success story.

We chose to differ

That we chose to differ is a fact we are proud of. We strive to simplify our vision and mission enough to persuade everyone we deal with to feel as passionate about civil engineering as we do. We do this by enjoying our work, seeking out innovative approaches that will enable us to unusually do the same usual things others do that lack the class and quality touch we achieve. We encourage the people we work with to do the same.

Our Annual Business Plan details the actions and resources which MUST be put in place and reviewed during the year to help us maintain our strategy "we chose to differ". These actions are developed through listening to clients' needs, analysis of competitors' approach and utilizing employee suggestions gathered through the Business improvement Team and field experiences.

Our Commitments

ZZB Construction Company Limited imbibes high mature and robust management system which integrates Quality, Safety and the Environment in our day-to-day operational activities. We are committed to going extra miles in ensuring our strategy and quality bench marks prevails in all our sites and offices.

Quality

From our first day in business, we have remained single mindedly focused in a Quality Management System which is the important distinction between our approach and what obtains across the board. For us at ZZB, quality is integrated with safety, environment and training, it has certainly worked for us and we strive to keep it.

We are poised to continually improve our performance by deploying appropriate resources, training and concern for clients interests with realistic, measurable objectives and targets being set and reviewed at every stage of an ongoing project.

Health & Safety

At ZZB, we are conscious of the fact that the business of civil engineering contracting carries all types of risks especially, those relating to the health and safety of the workforce and the general public who come into contact with the works.

Bearing in mind that everyone's health and safety is of the utmost importance informs our proactive approach to health and safety measures in our performances.

We are therefore committed to eliminating workplace injuries and minimizing the risk to the health, safety and welfare of employees, subcontractors, clients and the general public. We strive to systematically eliminate, hazards, reduce risks and modify unsafe behaviours, this commitment is fully Integrated into all our business operations.

Health and safety objectives are published annually and provide a focus for all company employees to measure and contribute to our overall performance.

Environment

We know that the construction-industry has a major influence on the environment. Particularly at risk are aquatic ecosystems, natural habitats, soils and the human environment at our construction sites and administrative offices. We are aware that environmental risk is created through the physical changes that engineering and its operations, have on the environment, the potential to pollute and the depleting nature of natural resources. But we are also proactively aware that engineering projects also have the potential to enhance the environment through amenity and service creation, employment opportunity and habitat improvement.

We are committed to making environment management part of our normal business practice and promote a culture of best practice within our company and employees.

Our Work

We pride ourselves as one of the fastest growing indigenous Construction Company in Nigeria. We work for a wide client base of both public sector bodies and private companies, carrying out a variety of works including major highways, bridges, sea and river defense, commercial and industrial, infrastructure and an ever increasing number of purely environmental schemes.

Over the years contracts have grown in size and range in value up to N25m on an individual project basis. We currently directly employ approx. 120 staff based throughout the country.
